Weatherboards & Profiles

Timspec stock a whole range of Weatherboard, Profiles & Mouldings, Soakers, and Fasteners specifically for the Building and Construction market.

Where we don't have a specific profile in stock we can usually run-to-order within 15 days.

Please refer to our pricelist or contact your local sales representative for current pricing.

WESTERN RED CEDAR

Cedar is recognised as a fabulous naturally stable and durable timber, eminently suitable for cladding. It is used widely in New Zealand, Australia and throughout North America. The light weight combined with the very stable nature of the species means it is hard to beat.

Grades: In Cedar we offer mainly "Number 2 Clears and Better" grade (also called PC1) although we do supply some of the "No4 Clears" (PC2) grade from time to time.

Supply: The vast majority of our Cedar stock is currently coming from certified FSC or PEFC suppliers.

COATINGS

Most of our Radiata Pine weatherboards are supplied preprimed, however we can coat both Pine and Cedar to your requirements, whether with a stain or paint. We are finding that more and more people are asking for coated product because it saves time and money on the building site.

Dark Colours: We do recommend that you do not use dark colours for stains and or paints as these attract heat and this exacerbates drying out and shrinkage and swelling. Although blacks and dark colours are trendy they are not going to enhance the life of any cladding.

RADIATA PINE

We currently offer Radiata Pine mainly in 150x25mm and 200x25mm Bevel Back weatherboards to the market at very competitive rates and can also run almost any profile as requested.

Grades: We carry a wide range of Radiata #1 and #2 clears in both feedstock and machined profiles.

Treatment: We are currently stock both the H3.2 CCA and H3.1 LOSP preservative treatments.

Supply: Where possible we buy Radiata Pine from FSC certified mills.

SOAKERS

We stock 150 and 200mm Soakers for Standard Bevel Back Weatherboards in the following materials:

- Copper
- Galvanised Steel
- Stainless Steel (T304)

Other profiles are available on request.

NAILS

We also stock nails in both Silicon Bronze and Stainless Steel (T316) in a range of commonly used sizes.
